

# TOPTICA Photonics Strengthens its Presence in France with Direct Sales and Service Operations

*Do not publish before January 01, 2024*

Graefelfing, Germany | January 1<sup>st</sup> 2024

**As of January 1, 2024, TOPTICA's French subsidiary TOPTICA Photonics SAS takes over the sales of TOPTICA products in France. This will strengthen the collaboration between French scientific or industrial customers and TOPTICA by offering a direct link between the partners. We envisage a dedicated sales and service consultation as well as opportunities for specialized product development or even common research projects. TOPTICA Photonics SAS will also distribute the products of HighFinesse GmbH, a valued partner of TOPTICA complementing TOPTICA's lasers with world-class wavelength meters and other optical analyzers.**

## **Dedicated to Excellence and Innovation**

The decision for TOPTICA Photonics to directly perform sales and service operations in France reflects the company's strategy to foster close relationships with this local market and to ensure the highest level of service for its innovative solutions for quantum technologies, biophotonics, and industrial metrology. We are very happy to announce that Mr. Vincent Aubertin, formerly Sales Director at our previous partner Opton Laser International, joined TOPTICA Photonics SAS. In his new position as Sales Director for France, he will continue to keep and foster the relationship with French customers and will be responsible for excellent product consultations. Customers will profit from his excellent expertise in TOPTICA's and HighFinesse's product portfolios and his technical education as optics engineer. During a half year transition phase, Opton will continue to follow-up ongoing sales projects. All new requests shall be directly addressed to TOPTICA Photonics SAS.

## **Appreciating our Long-term Partnership with Opton Laser International**

As we embark on this exciting new chapter, TOPTICA Photonics wishes to extend heartfelt gratitude to Opton for their years of service as our Sales and Service Partner in France. Their dedication and expertise have been instrumental in establishing a strong presence for TOPTICA and HighFinesse products within the French scientific and industrial sectors. We celebrate the journey with Opton Laser International, which has paved the way for a seamless transition, and we look forward to continuing our friendship and exploring new possibilities for collaboration in the future.

## **About TOPTICA**

TOPTICA has been developing, producing, and marketing high-end lasers and laser systems for scientific research and industrial applications for more than 25 years. The portfolio includes diode lasers, ultrafast fiber lasers, terahertz systems, optical frequency combs, and since year 2023 fiber amplifiers. Worldwide, TOPTICA has 490 employees in six business units with a consolidated group revenue of €130 million.
